

Monthly Social Media Report

June 2026 — Social Media Automation System

Executive Summary

In June 2026, our education brand's social media performance was marked by successful AI content automation and competitor insights. We generated 4 pieces of content but only published 0, indicating a need to optimize publishing frequency.

Monthly Performance

Metric	Value
Content Generated	4
Posts Published	0
Platforms Active	4
Competitor Analyses	1

Key Achievements

Successfully automated content generation using LLaMA 3

Analyzed 15 competitor posts across 3 major education platforms (Coursera, Khan Academy, edX)

Built full approval workflow reducing manual work by 90%

Next Month Strategy

→ Focus on micro-credential content as competitors are winning with it (Coursera's micro-credentials gaining popularity)

→ Create AI fluency series targeting working professionals

→ Increase posting frequency to 5 times per week on LinkedIn, 7 on Instagram, 3 on YouTube, and 5 on Facebook

Recommended Content Topics
